

A Modern Guide to Calistoga: Volcanic Hot Springs, Retro Wineries + More [Updated]

The natural volcanic hot springs in Calistoga were originally discovered by the Wappo tribe more than 500 years ago; their rumored healing powers remain a draw today, along with venerable wineries, classy eateries, and luxury resorts. Knowing this, we have just two words to describe this gem of a town: Napa, who?

Tank Garage Winery makes its home in a classic gas station, where it produces unique wines and celebrates California culture.

Tank Garage Winery

Situated in a retro, 1930s-era gas station, Tank Garage Winery produces small collections of unique wines that celebrate the heart and soul of vintage California culture and creativity, ranging from refreshing rosé, to delicious red blends and aromatic chardonnays. Tank also partners with local artists and illustrators to create labels for each bottle that embody the taste of their wine blends. The Instagram-worthy space is decorated with funky art and vintage items such as classic motorcycle, guitars made from old oil cans, and pinball machines. There's even a speakeasy—but you'll have to figure out the password for yourself.
